■ cv.aiwaverider.com

■ Berlin, Germany

■■■ PROFESSIONAL SUMMARY

Experienced Senior Software Engineer with 7+ years in enterprise software development, specializing in microservices architecture, cloud technologies, and AI integration. Proven track record of delivering scalable solutions for major clients in finance and automotive sectors. Expert in Java, Spring Boot, cloud platforms, and modern development practices. Currently building **AI Waverider**, a platform offering 5,600+ free AI agents and automation workflows.

■ PROFESSIONAL EXPERIENCE

Senior Software Developer & Digital Transformation Consultant

Accenture GmbH

August 2022 - Present

Major Finance Sector Clients: Led critical digital transformation projects for top-tier German financial institutions

Finance Sector Achievements:

- Architected and deployed cloud-native microservices using **Spring Boot 3.x** and **Java 17** for high-volume financial transactions
- Implemented enterprise-grade solutions on **OpenShift**, **Azure Cloud**, and **Google Cloud Platform**
- Delivered real-time payment processing systems handling millions of transactions daily
- Ensured compliance with financial regulations (PCI-DSS, SOX) and data protection standards

Automotive Industry Contributions:

- Developed microservice architecture for major German automotive manufacturers
- Built responsive frontend applications with **VueJS3** for vehicle management systems
- Architected and split monolithic applications into eight separate microservices
- Optimized supply chain management systems increasing efficiency by 35%

Leadership & Innovation:

- Led agile cross-functional teams with onshore/offshore coordination across 3 time zones
- Participated in AI hackathons, integrated Azure OpenAI solutions - **team won global competition**
- Implemented SonarQube for quality assurance and code security scanning

Application Developer with Low Code Platforms

Scopeland Technology GmbH

May 2022 - July 2022

- Developed advanced SQL database optimization strategies for enterprise clients
- Fulfilled complex customer requirements using cutting-edge Low Code platforms
- Created dynamic websites with custom business logic implementations
